HELICA CEMENTLESS HIP SYSTEM TRAINING SEMINAR

The smart, new alternative to conventional cementless hip replacement

An accredited, interactive, practical lab training seminar that prepares the veterinary surgeon to select HELICA candidates, perform HELICA surgeries, and monitor the recovery process.

Presented by
MEDICATECH VET 800-817-5030

SEMINAR OBJECTIVE

The objective of Medicatech's seminar is to introduce the new HELICA Canine Cementless Hip Replacement System.

The HELICA Hip System has been performed successfully in Europe in over 60 surgeries. In all cases, the animals were weight-bearing within 1 day of surgery and fully recovered in 6 weeks.

Features of the seminar include:

- Evaluation and diagnosis
- HELICA components
- Determination of implant sizes
- Surgical techniques
- Performance of the HELICA Hip surgery
- Recovery and rehabilitation.

Lab Practicals

The Doctors will perform the HELICA surgery, under the guidance and supervision of the presenter. The seminar's goal is for participants to have confidence to perform the procedure in their clinics.
